JOURNEY TO YOUR WEALTH

## COMPANY PROFILE

### BACKGROUND

South Africa is one of the largest economies in Africa. It boasts of large conglomerates both national and international. It has stable financial institutions and world class banking systems. However, what is glaring about our country is that it is classified as one of the most unequal countries in the world- this means, while SA is one of the largest economies in the continent, it not only has too many poor people, but also the gap between the poor and the wealthy is too wide. Another stark distinction is that the proportion of the poor amongst black people is far in excess of that of other demographics. The economy and the wealth are still white dominated and will continue to be until, as black people, we begin to deliberately and actively find ways of changing our collective fate.

It is against this background that FOLP Investment Company (PTY) LTD was established.

### Who We Are

We are a group of black, middle and working-class men and women - a mixture of actively and gainfully employed, professionals, self-employed entrepreneurs and small business owners. We have come together to be part of the change we want to see by consciously and actually creating our own wealth. We do this by contributing a portion of our individual income towards raising capital for investment in various industries. Our contributions are fixed and are monthly for a locked period of time in order to get maximum impact and returns.

### Vision

Our vision is to create sustainable wealth and build a legacy we can be proud of for generations to come.

### Mission

- To be a formidable player in the economy over a long-term period.
- To educate ourselves and partake in all relevant and related industries in order to accomplish our vision
- To grow our investor pool every year to reach more shareholders
- To expand and have investors in the rest of the continent.
